

ANNISE D. PARKER  
MAYOR

OFFICE OF THE MAYOR  
CITY OF HOUSTON  
TEXAS

March 30, 2010

The Honorable Kevin Brady  
U.S. House of Representatives  
301 Cannon Building  
Washington, D.C. 20515

Dear Congressman Brady:

On behalf of the City of Houston, I am writing to request your support for a very significant piece of legislation that affects municipalities all over Texas, including Houston.

Rep. Tammy Baldwin, D-Wisconsin, introduced the Community Access Preservation Act (the "CAP Act") in October 2009. H.R. 3745 addresses several issues related to cable operators providing access channels and funding for public, educational and government programming, and is discussed further below.

Throughout this country's history, First Amendment rights have remained sacred. Our nation's telecommunications and video programming policies have been formed with a recognition of these rights, and with the intent to provide a forum for the free and open expression of varying viewpoints and ideologies. The Federal Communications Commission (FCC) has continually sought means to allow the public an opportunity to use the media and to make the media responsive to local needs.

Public, Education, and Government (PEG) Access TV channels are those cable television channels set aside for use by the general public, local schools and colleges, and by local governments. Through the City and State franchise agreements with the cable/video operators that operate in the Houston area, there are four cable channels for PEG programming.

There are three types of PEG channels:

- 1) **Government access channels** are set aside for local government meeting coverage and in-depth discussions of community issues. HTV, the City of Houston's government channel, broadcasts programming 24/7, including City Council meetings, Harris County Commissioner's Court meetings, Council Committee meetings, town hall meetings, and other important local government activities. Just as the Cable-Satellite Public Affairs Network, commonly known as **C-SPAN**, airs non-stop coverage of government proceedings and public affairs programming at the federal level, HTV airs coverage of proceedings at the local government level. HTV does not accept outside advertising.

The Honorable Kevin Brady  
March 30, 2010  
Page 2

- 2) **Public access channels** are set aside to allow members of the public to distribute their own video presentations on cable television. Public access television stations often provide training and technical assistance to citizens and nonprofit organizations who want to produce their own video programs. Houston Media Source is the public access channel administrator for the Houston area.
  
- 3) **Educational access channels** are set aside to allow schools, colleges and universities to produce educational programming for the community. School districts, community colleges and universities rely on access channels to provide distance learning opportunities and to communicate directly with the community about policies and activities. Both the Houston Independent School District (HISD) and the Houston Community College System (HCCS) operate PEG channels in the Houston area.

In recent years, funding for PEG has been threatened, and in many municipalities PEG operations have ceased. Local governments are at the mercy of their cable operators, as funding for PEG is paid by local cable companies. H.R. 3745 clarifies important language in the Telecommunications Act and would solidify the requirement for, and uses of, PEG funding.

PEG channels are important, providing access to broadcast media and transparency in government. Please show your support for PEG by adding your sponsorship to H.R. 3745. Thank you for recognizing the importance of access television in our local communities.

Sincerely,

Annise D. Parker  
Mayor
